

# SWARCO SIGNS

## TRUCK PARKING SIGNS

The Truck Parking Sign by SWARCO Signs is used on highways to convey real-time traffic information to drivers. This sign can have full color capabilities and can display a variety of messages such as information about weigh stations, truck parking availability, lane restrictions, low bridge warnings, and routes optimized for trucks. This information helps drivers make informed decisions about their routes. These signs are often placed at strategic locations where they can be easily seen by truck drivers.

### KEY BENEFITS

- Sign locations can support up to 1-3 signs per site on one static panel
- Yields a 100 mile range for rest area or truck stations
- Provides up to 999 spaces or the option that the location is full
- Requires less power
- Offers a cost effective, solar solution

### PRODUCT DESCRIPTION

The Truck Parking Sign features SWARCO's patented lens technology and flat black front panels creating a high-contrast ratio for superior visibility. The sign's main application is to direct the flow of incoming and outgoing traffic for truckers. It also helps redirect other motorists from entering into these lots unnecessarily.

The Truck Parking Sign is ideal for any entity such as DOT or GOV, which require highway markings for its motorists. This sign will help to solve the constant congestion that occurs in parking lots.
