

SWARCO SIGNS EDGE-LIT SIGNS

The Edge-Lit Sign by SWARCO Signs enhances nighttime visibility with a sleek, lightweight design and evenly distributed LED illumination. Combining style and performance, this sign improves driver navigation, supports pedestrian safety, and helps emergency responders locate intersections with speed and accuracy. It's a visually striking, low-power solution designed for municipalities that value both form and function.

KEY BENEFITS

- Low-profile housing reduces weight and fits both retrofits and new installs
- Edge LEDs deliver bright, consistent lighting for better visibility and recognition
- Uses less power than backlit signs, supporting long-term savings
- Tool-free panels allow quick, hassle-free service and inspections

PRODUCT DESCRIPTION

The Edge-Lit Street Name Sign is the ideal solution for enhancing visibility and aesthetics across a wide range of roadway environments. Perfect for signalized urban intersections, mid-block cross streets with limited lighting, high-traffic commercial corridors, tourist districts, campus roadways, and mixed-use zones, it meets the needs of municipalities that value both performance and modern design.

Built for durability and efficiency, this sign features weather-sealed electronics, a lightweight yet robust housing, and ultra-efficient LED edge lighting for brilliant legibility with minimal power use. Even illumination ensures readability in all conditions, while tool-free service access allows fast, easy maintenance.

Available in traditional and flag-style configurations, the Edge-Lit Street Name Sign mounts to mast arms or poles and delivers a sleek, contemporary profile built for long-term reliability. It is an ideal choice for communities seeking style and performance.
