

SWARCO McCain CALIFORNIA

FEATURED DEPLOYMENT

CITY OF DOWNEY

SWARCO McCain helps City of Downey communicate to all signalized intersections

OVERVIEW

The upgrade included citywide MyCity TMS¹ licenses for 112 signals, a new server, desktop and laptop, Ethernet communication modules for the city's older 170 controllers, as well as, professional services for delivery and training.

LOCATION

The City of Downey, which is home to more than 113,000 residents in 12.41 square miles, is a diverse and dynamic community in the heart of Los Angeles County. The city is approximately 15 miles from Downtown Los Angeles, and 5 miles from Orange County.

THE CHALLENGE

The city needed enhanced connectivity and signal timing control for the city's signalized intersections. They also required fiber optic communications and a new traffic management software system at City Hall.

SOLUTION

With the implementation of MyCity TMS, the city is now able to communicate to all of their signalized intersections. This allows the traffic management center to receive alerts and status information from their entire signalized network, as well as, update signal timing to all 112 signals remotely. MyCity TMS provides dependable monitoring and control of signalized intersections in small and large environments, and was a great solution for the City of Downey.

BENEFITS OF MYCITY TMS

- Monitor system-wide traffic conditions and devices
- Adapt to the needs of your transportation network as they evolve
- Analyze performance and trends
- Enable proactive management
- Centralize documentation and inventory control
- Ensure system integrity through data validation

TESTIMONIAL

"In searching for a new partner to provide a new central traffic management system for the City of Downey, we evaluated different solutions with onsite demo systems. Of all the systems tested, the SWARCO McCain MyCity system performed the best and therefore was selected as the winner. In addition to superior software technology, SWARCO McCain has provided a very high level of service."

Ed Norris

Director of Public Works, City of Downey
